Single and Dual Head Stethoscopes

Used for listening various sounds of heart, lung and organs in human body.

The single head model consists of lightweight aluminum chest-piece, adjustable chrome plated brass binaural, durable one-piece molded PVC "Y" tubing and pure white ABS eartips.

The dual head model consists of same binaural, "Y" tubing and eartips, and a lightweight chest-piece and a bell which face opposite directions and features two functions. Turning the convertible axis to function each head. Both models provide good acoustic response and comfort fit.
